

DANDARA ALMEIDA

FRONT-END DEVELOPER

ABOUT ME

I just start my journey as a front-end developer. After 10 years working in newsrooms and press offices, I figure out my real motivation: **user experience** and **programming**.

Currently, my focus is to keep on learning how to develop codes aligned with **accessibility** concepts to deliver more effective content and experience, oriented to an increasingly diverse audience.

Intercom (2012 - 2013)

Senac (2010 - 2012)

DANDARA ALMEIDA

FRONT-END DEVELOPER

Cover Letter

I was a journalist for 10 years but in 2017 I joined a tech company (Easy Taxi) as a customer support analyst. After a year, my responsibilities changed to customer services trainer where I helped to improve not only the local training but in the LATAM area. I worked on structuring the global FAQ content. Furthermore, I participated in projects with the target of put in contact teams of customer services and technology using the insight from the users to improve our product.

In 2018, when Cabify acquired Easy Taxi, I joined the Product Marketing team. The company was in migration and my job was the internal communication from the product team to the rest of the company. I did internal communication (the content and HTML/CSS layout of it) and the technical documentation to spread the knowledge in Latam and Europe offices.

I have little experience working as a developer but certainly, I am very eager to learn. My experience working in international startup teams, managing communication, working with people in different countries, and my concern about the communication quality and the user, I think could be very useful for your team.

I remain at your disposal.
Thanks.
